

HAWK BRAKE PAD COMPOUNDS - ALL

- HPS 5.0
- HP Plus
- Black
- Blue 42
- HT-10
- Street Race
- DTC60
- DTC70

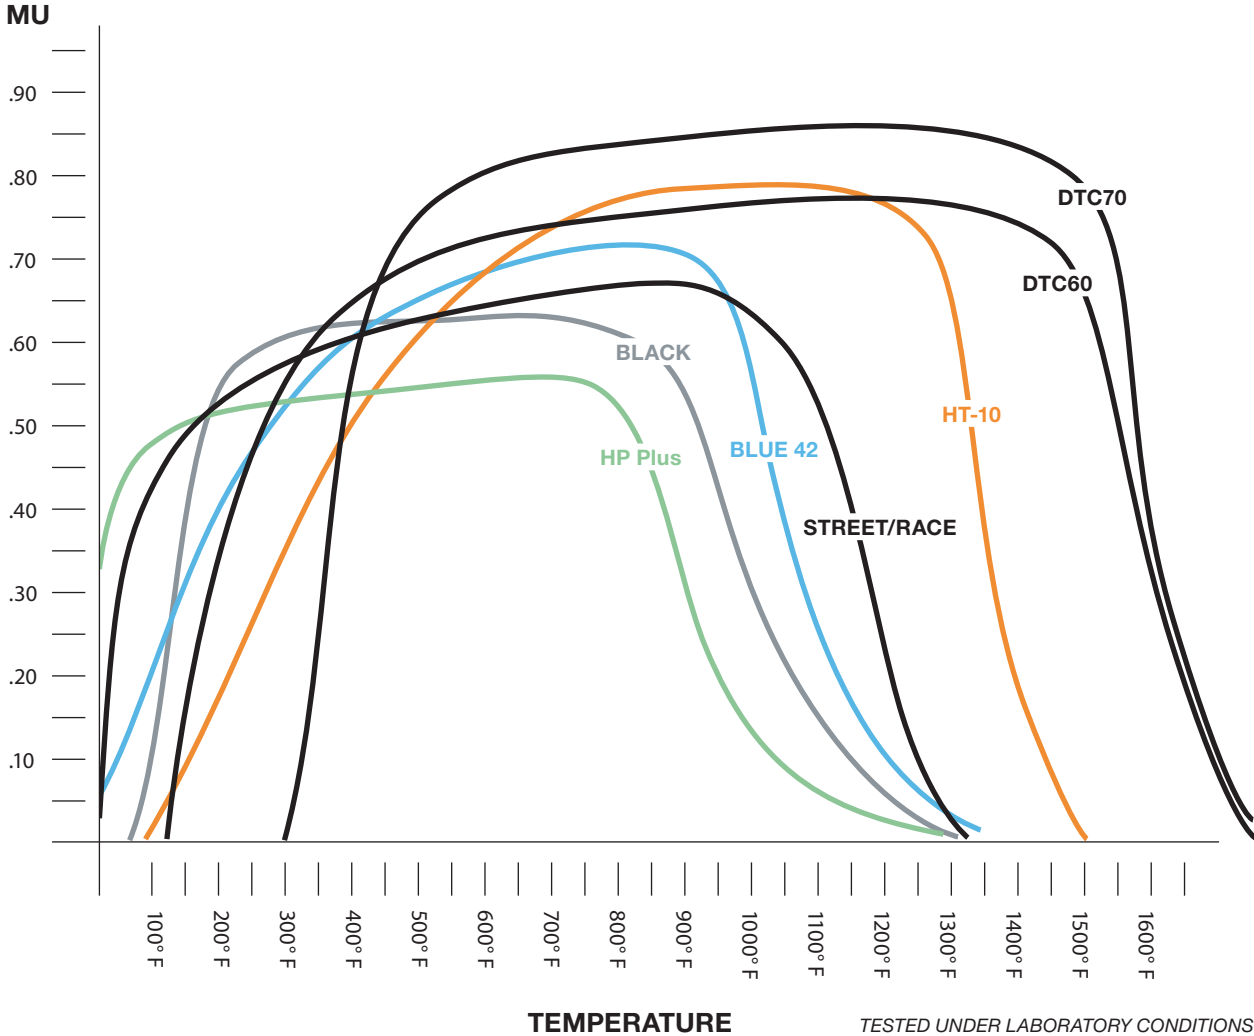

*The Mu factor represents a measurement of the brake pad's coefficient of friction against the brake rotor surface with 0 representing no friction and 1.0 equal to no movement at all. Because the Mu factor changes with brake pad temperature, the curve developed across the normal operating range will represent the pad's expected performance level on the vehicle.

HAWK BRAKE PAD COMPOUNDS - STREET

*The Mu factor represents a measurement of the brake pad's coefficient of friction against the brake rotor surface with 0 representing no friction and 1.0 equal to no movement at all. Because the Mu factor changes with brake pad temperature, the curve developed across the normal operating range will represent the pad's expected performance level on the vehicle.
