

SOLO SPEC COUPE (SSC) RULES

Purpose: Develop a unique Solo class that is primarily focused on driving skill by having drivers compete in nearly identical cars; a designated make/model with a specified performance package and allowances

Objective: Select a modestly priced rear wheel drive late model enthusiast vehicle that is useful as both a "daily driver" AND for Solo, matched with a unique combination of vehicle modifications that are embraced by today's enthusiast aftermarket to enhance the driving experience while meeting the following criteria:

Maintain street ride, daily use capability and a fun level of Solo performance

Reliability and cost containment

Simple and easy availability of vehicle and allowed modifications

Selected Vehicle: 2013 to 2016 Subaru BRZ or Scion FR-S

Preparation Level: O.E. components or components specifically listed in the Stage 1 and Stage 2 Packages below may be used. For components not specifically listed in the Stage 1 or 2 Packages, the Solo Street Category allowances apply. Vehicles will be allowed to be "under prepared" without all allowed modifications being installed.

STAGE 1 Performance Package: *Tire Rack is SCCA's Coordinating Partner*

Kit Components:

- Eibach Pro-Plus Kit
Part # TR82105.880 (Front/rear springs and front/rear adjustable anti-roll bars)
- Koni Sport Shocks, factory sealed
Part # 8741-1560LSSC (Front Left Strut)
Part # 8741-1560RSSC (Front Right Strut)
Part # 8041-1416SSC (Rear)
- SPC Front Alignment Kit
Part # SPC60620T (camber bolts, adjustable lower control arms and toe arms)

Purchase Conditions:

- Stage 1 Package, or individual kit components, are available to SCCA members at discounted price exclusively through Tire Rack.
- If not an SCCA member, membership information will be provided by Tire Rack during the ordering process.

STAGE 2 Performance Package: *Tire Rack is the preferred supplier*

Tires: Size 225/45R17, minimum 200 UTQG. A specific brand tire (spec tire) matching the size and UTQG above, is being considered for 2018 and beyond.

Wheels: 17x8, minimum 17 pounds, minimum wheel offset 40

STAGE 3 Performance Package: *Exclusive supplier TBD*

PCM/ECU Retuning (spec tune with ability to effectively monitor is being researched and considered for the future)
