If any of a set of four Vredestein tires in the above patterns installed on the same vehicle reaches the end of its "usable treadlife" before the accompanying miles (kms) is reached you will be given a credit toward new Vredestein tires equal to the proportionate cost of the new tire for the difference between the miles (kms) warranted and the number of miles that the original tire was used.

To make a claim under this coverage, you must rotate the tires every 6,000 miles (9,956 kms) or as recommended by the vehicle manufacturer and must provide evidence of rotation and maintenance including alignment upon request. Some vehicles come from the vehicle manufacturer with "split fitments" – meaning different size tires on the front and rear axles. Because these tires cannot be rotated as recommended by Vredestein, the mileage warranty on each rear tire will cover half the number of miles as the standard mileage warranty for that tire design.
